

REFRACTORY DESIGN-SUPPLY-INSTALLATION
Acid Resistant Construction—Abrasion Resistant Linings

Serving the International Market Place

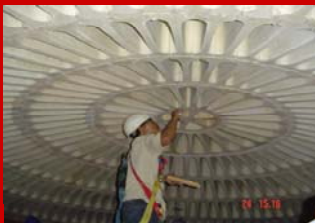

Quantum International Group, Inc. (QIG) is a Refractory Engineering and Contracting Company with the purpose of providing refractory engineering and construction solutions and design services to the international community. We are here to resolve refractory issues and provide reliable "turnkey" projects.

Project Safety is a core value of our company. QIG maintains an excellent safety record and is committed to the safety of our personnel on all projects.

QIG Project Managers and Engineers are capable of all areas of refractory design, turnaround scope development, thermal analysis, refractory consulting, refractory failure investigation, project budgeting, project scheduling and project management.

QIG operates independently of all refractory manufacturers. QIG Engineers and Project Managers are able to specify and supply refractory materials that are best suited for the intended application. Refractory materials are selected based on proven industry reliability, performance and cost effectiveness, or simply as preferred by individual clients.

QIG supplies refractory lined equipment and pre-cast shapes.
